

Semenov Volodymyr

I am in the business of building responsive UI applications which connect with API's and other backend technologies. I specialize in front-end development for web3 applications.

I am interested in learning new technologies and solving different interesting tasks. Though I am most experienced in building front-end applications using React, having worked with it for the past five years having worked with it for the past five years having worked with it for the past five years, I am a quick learner and can pick up new tech stacks as needed.

Deeply passionate about creating visually captivating and intuitive interfaces that enhance user satisfaction.

09.2015 - 06.2021
DNIPRO STATE MEDICAL UNIVERSITY
Medical case

EXPERIENCE

02.2023 - 08.2023

Tacans Labs

Middle React Engineer

As a Frontend Developer specializing in React, I had the privilege of contributing to a groundbreaking web3 project focused on the development of a decentralized exchange across NEAR, EGLD, and CCD blockchains. My role was pivotal in bringing this cutting-edge concept to life, and my responsibilities included:

- Collaborating closely with blockchain engineers and backend developers to seamlessly integrate frontend components with the NEAR, EGLD, and CCD blockchain networks.
- Implementing responsive and user-friendly interfaces that enabled users to seamlessly trade across multiple blockchains, ensuring a consistent and intuitive experience.
- Leveraging the capabilities of React to architect and develop intricate functionalities, such as real-time trading updates, cross-chain liquidity pooling, and secure wallet integrations.
- Adhering to blockchain standards and protocols to ensure the secure handling of transactions, assets, and user data.
- Effectively managing application state using advanced state management libraries and techniques tailored to the unique challenges of decentralized exchange platforms.
- Optimizing performance to ensure rapid execution of trades and responsiveness of the user interface, even in a decentralized network environment.
- Collaborating with design teams to translate complex blockchain concepts into visually engaging interfaces that guided users through the decentralized exchange process.

12.2022 - 02.2023

DevGears Pro

Front End Web Developer

- Developing high-quality user interfaces using HTML, CSS, and JavaScript, with a focus on modern design and seamless interaction.
- Implementing functionality in accordance with design and requirements using the React library, utilizing a component-based architecture.
- Interacting with the server through APIs to retrieve and send data, ensuring smooth and efficient communication between frontend and backend.

11.2021 - 11.2022

Cyberflip, Tokenframe

Front End Web Developer & PO

- Develop new frontend functionality for the product (using React, Typescript, Redux-Toolkit, SASS);
- Extend existing components and apps based on requirements;
- Working with PWA;
- Increasing functionality;
- Worked with blockchain technologies, namely with authorization through a wallet (Metamask, Solana, Coinbase);
- Code refactoring (Replacing Hookstate with RTQ)
- I was engaged in filling out technical documentation, organizing the work of the team. Resolved design issues as needed
- Communication with the team and customers
- Deploy to dev and prod services (with Jenkins and manually)

10.2018 - 06.2021

BlasFit, Dnipro, Ukraine

Personal and Group Trainer

SKILLS

- HTML, JS
- CSS, SCSS, Tailwind
- React, Next.js
- Redux, Redux-Toolkit, RTQ, Persist, MobX, Effector
- Typescript
- Node.js
- Web3.js
- Firebase, MongoDB
