Technical Skills

- HTML
- CSS
- Javascript
- React
- Next JS
- Typescript
- Redux
- Web3
- Tailwind
- Vite JS
- Cypress
- Firebase, Netlify

About

I specialize in building mobile responsive front-end UI applications that connect with API's and other backend technologies. I'm passionate about learning new technologies and understand there is more than one way to accomplish a task. Though I am most proficient in building front-end applications using HTML, CSS, Javascript, and React, I am a quick learner and can pick up new tech stacks as needed. I believe that being a great developer is not using one specific language, but choosing the best tool for the job. Diverse analytical skills, team collaboration, and relationship building. Professional and innovative web developer and motivated leader, with solid interpersonal abilities and complex problem-solving skills. Effective and proven track record of critical thinking and idea generation.

Work Experience

Front End Web Developer & PO (11.2021 - 11.2022)

Ukraine

- Ensured comprehensive web and mobile responsive UI layouts with understanding of HTML, CSS, and JavaScript. Working with PWA
- I was engaged in filling out technical documentation, organizing the work of the team
- Resolved design issues as needed
- Worked with blockchain technologies, namely with authorization through a wallet
- Code refactoring (Replacing Hookstate with RTQ)
- Communication with the team and customers
- Deploy to dev and prod services (with Jenkins and manually)
